Creating an order for Joinery Scene

- 1- Import project into micromanager. [\[How to import .xls files\]](#)
- 2- Separate into rooms if needed.
[\[How to create a new room\]](#) [\[How to move cabinets to another room\]](#)

If there is:
 - More than one colour - place each colour into a different room.
 - More than one drawer type.
 - Any cabinet (s) that need to be altered by Joiner Scene in anyway.
- 3- Add required specifications for each room [\[Stranded cabinet specs\]](#) [\[How to add specifications\]](#)
 - 00 – Door Type
 - 01 – Door Colour *(always required)*
 - 02 – Door Edge
 - 03 – Carcase Edge
 - 04 – Panel Type
 - 05 – Panel Colour
 - 06 – Panel Edge
 - 07 – Drawer Type
 - 08 – Handle Type [\[Handles Joinery scene offer\]](#)
 - 09 – Hinges
 - 10 – Special Hardware
 - 11 – Comment
- 4- Renumber Cabinets [\[How to renumber cabinets\]](#)
 - Renumber the specifications first starting at 1.01 for the first room 2.01 for the second room and 3.01...
 - This is important so they are in the correct position on the order sheet.
- 5- Make any necessary changes to the cabinet sizes in the prompts [\[Cabinets that need a detail sheet with every order\]](#)
 - Height
 - Width
 - Depth
 - Modification [\[What is a modification\]](#)
 - Add comment for any modification (No comment no modification)
- 6- Changes to cabinets
 - Any cabinet that requires Joinery Scene to alter in anyway will need 1 x Modification selected for each change made. [\[Where to find the modification\]](#)

- Cabinets with accessories will select the correct size to fit the cabinet width you enter. If you enter a width that is out of the parameters of the accessory a message will pop up asking to change the size. A cabinet with an accessory cannot be changed in the Height or Depth these are greyed out also some cabinets with accessories will have the Width greyed out and cannot be changed because the cabinet needs to be a set size to fit the accessories.

All changes must be made from the **product prompts** not on the **product list**. If a measure is changed on the product list the warnings will not work and the unit may not be correct (*This will be at your expense to correct*). Cabinet names **MUST NOT** be changed on the product list. If the names are changed on the product list the cabinet will not be found in the Joinery Scene library and will not be manufactured.

Lead Times

| Production | Specification | Days | Comment |
|------------|--|------|---|
| One | Standard Cabinets | 10 | 2 Door Base – Just width changed |
| | Prime Stock Sheets | | Drawer Cabinets – 450mm cutlery tray |
| | Melteca Stock Sheets | | |
| | Custom Wood Sheets (MDF) | | Paintable tape to edges, but no sanding on the faces or backs of doors and panels |
| Two | Nonstandard cabinets | 15 | Extra parts / measurements required (special sheet with info must be included) |
| | Horizontal Grain | | Horizontal grain (special sheet with info must be included) |
| | Prime and Bestwood nonstock boards | | Special press and indent |
| | Strip Handles / Hidden Handle | | Standard anodized finish Venice & hidden handle |
| | Glass Doors | | Any glass doors or glass shelves |
| | Plywood (unfinished) | | No sanding plywood in its raw state |
| Three | Melteca nonstock boards | 20 | Special press and indent |
| | Alloy Doors | | Any alloy door |
| | Roller Doors | | Any roller door – frame can be done in Deignatek but the door can not |
| | Strip Handle / Hidden Handle powder coated | | Any handle powder coated in any colour |
| | PSP Acrylic Board | | |
| | Plywood (ready for finishing) | | Sanded ready for lacquering |
| | Veneer (ready for finishing) | | Sanded ready for lacquering |
| | MDF (ready for finishing) | | Sanded ready for lacquering |
| Four | Deignatek Foil | 22 | When ordering Deignatek Panels, use panels from Deignatek folder |
| | Deignatek Acrylic | | |
| | Panelform | | |
| Five | Plywood (Finished) | 30 | Lacquered |
| | Veneer (Finished) | | Lacquered |
| | MDF (Finished) | | Lacquered |

Ranges

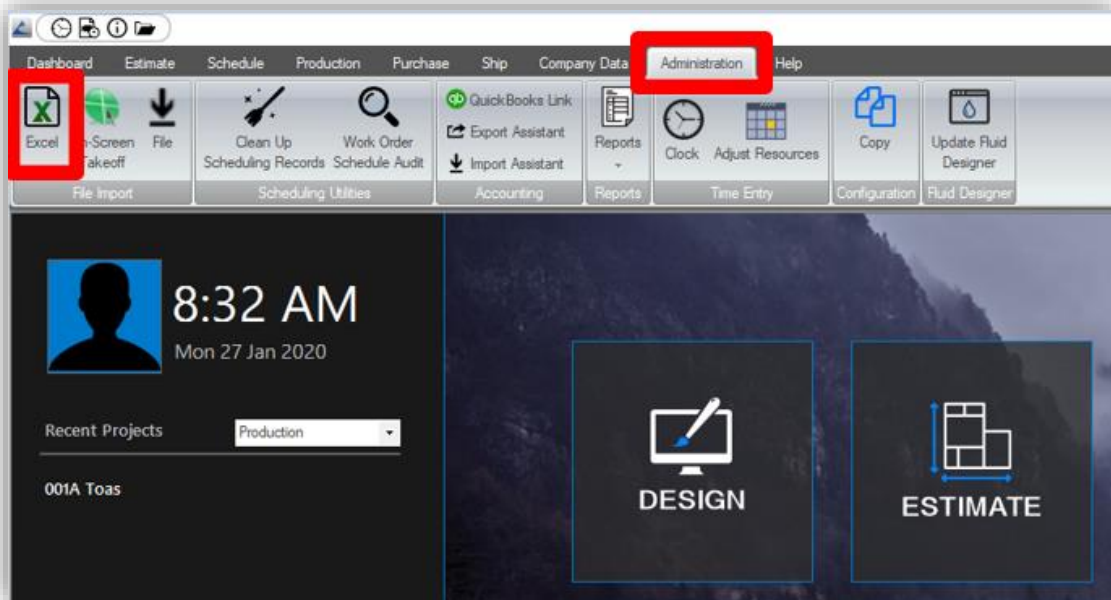

| Range | Specification |
|-------|--------------------------|
| One | Prime Stock Sheets |
| | Melteca Stock Sheets |
| Two | Prime nonstock boards |
| | All Bestwood colours |
| | Plywood |
| Three | Dezignatek Thermoform |
| | Prime Acrylic |
| | Prime Laminate Soft Matt |
| | Dezignatek Acrylic |
| Four | Painted Doors or Panels |
| | Veneer Doors or Panels |

Order Example:

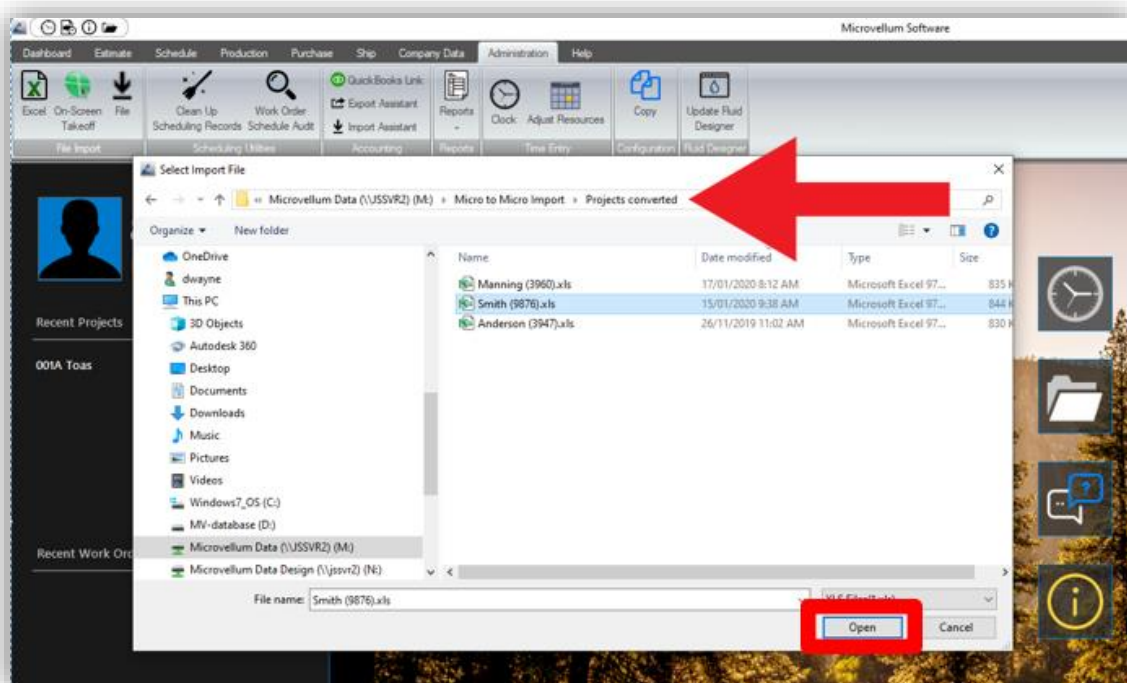

| Order name | Name (1234) | Colour |
|------------------------------|---|-------------------------------------|
| Room: | Kitchen | Prime White Embossed – 2mm |
| | | |
| 1 Door Base Left | No modification | Range one – Production one |
| 1 Door Base Right | No modification | Range one – Production one |
| 3 Drawer Base | No modification | Range one – Production one |
| 3 Drawer Induction | No modification | Range one – Production one |
| P1LE | No modification – Bestwood Urban Velvet | Range two – Production one |
| P2LE | No modification – Bestwood Urban Velvet | Range two – Production one |
| OBR-BOX (Roller door) | No modification | Range one – Production Three |
| | | |
| Range | Production | Days |
| Two | Three | 20 |

How to import xls files

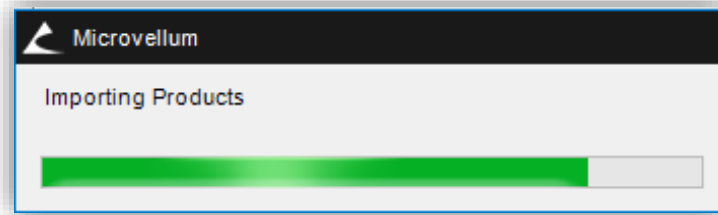

1. Open micromanager
2. Click the Administration tab then select Excel

3. Path to the project you want to import and click open

4. Processing box will appear while it imports the cabinets

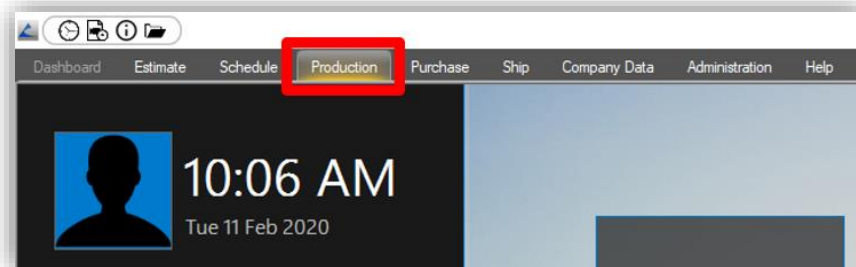

5. Click ok and you're done

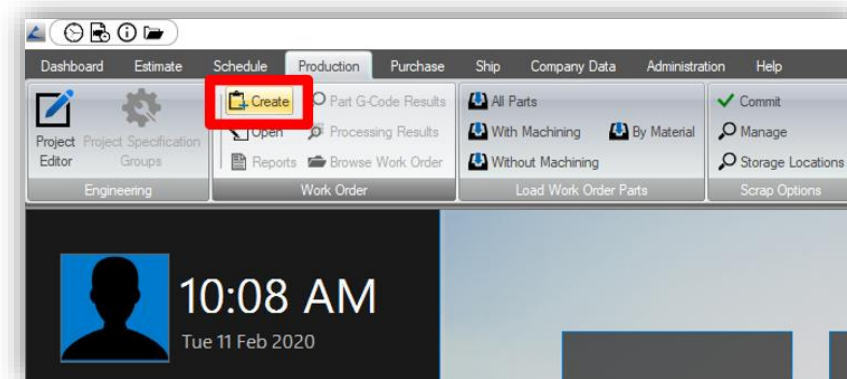

Creating reports

1. Open micromanager
2. Select production tab at the top left

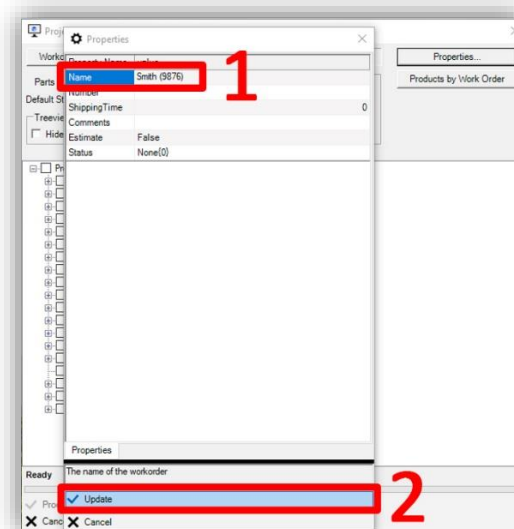

3. Select create from the work order tab

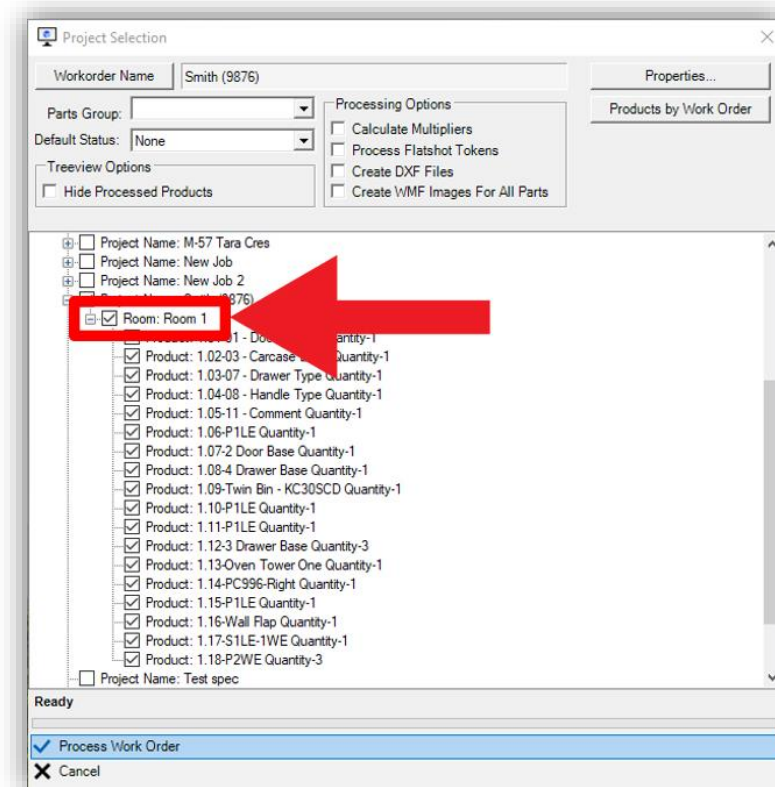

4. Select properties and enter project name e.g. Smith (9876) click update

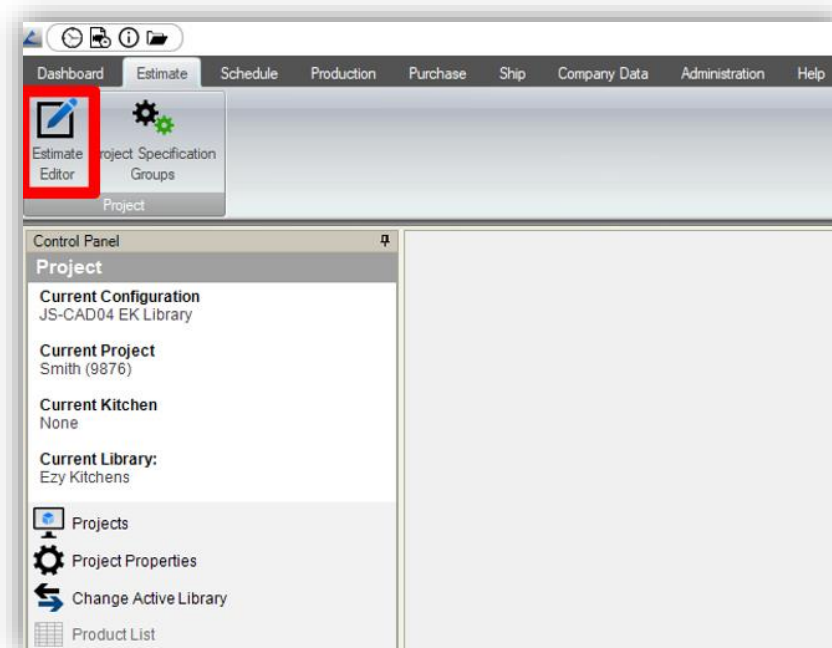

(Please **do not use capital letters** for the entire name. This makes the name to long for our stickers in some cases)

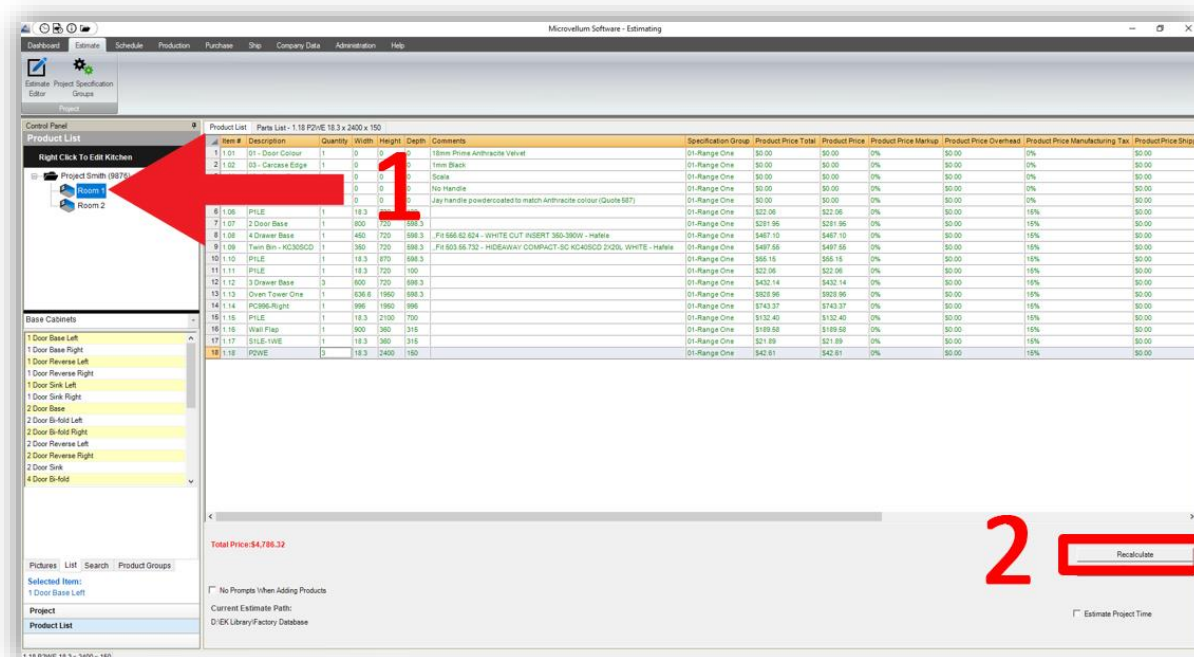

5. Tick the box next to the project or select the room(s) or select cabinet(s). Then click process work order

6. When completed click on the estimate tab then estimate editor and open the project again.

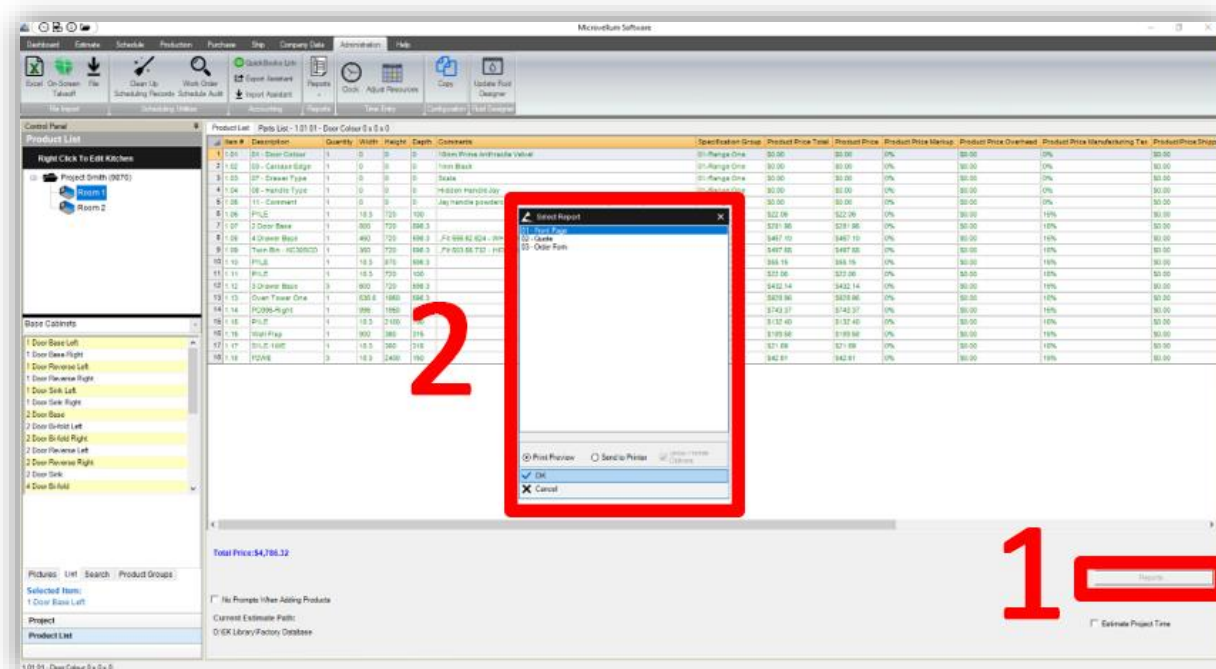

7. Select the project or single room and click recalculate

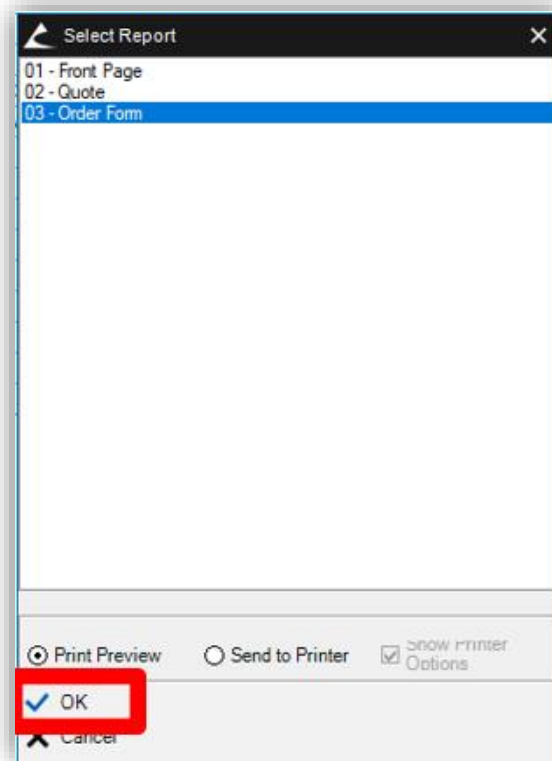

8. Select reports and print to pdf:

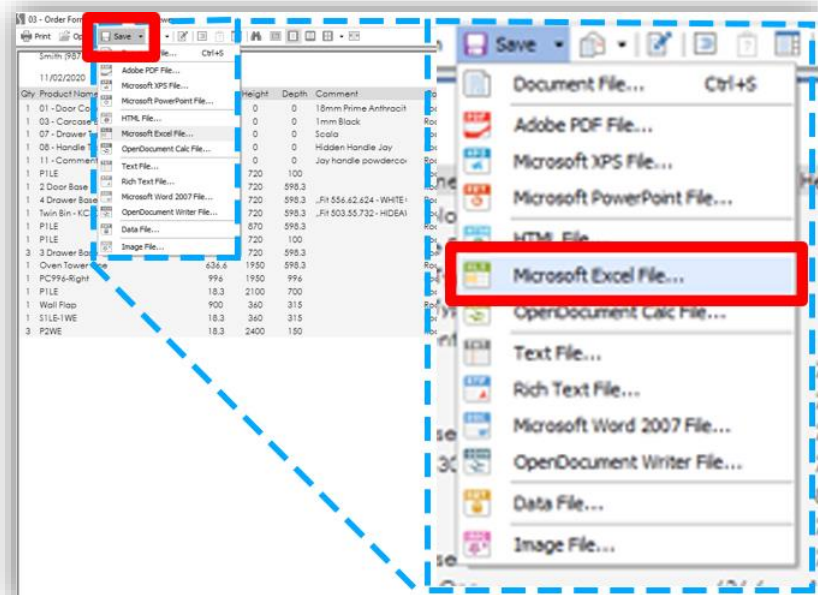

- 01 - Front page (This has the specifications for the kitchen that you entered into the rooms)
- 02 - Quote (This is the cost of your order including all the modifications)

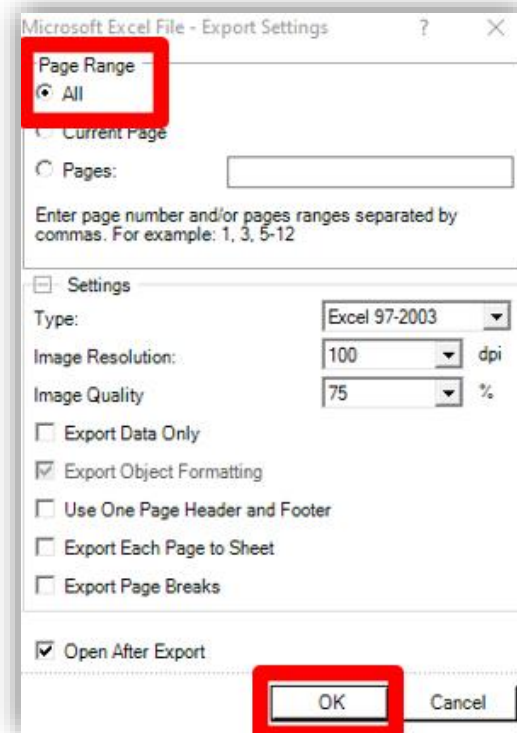

9. Select the 03 - Order Form

10. Instead of clicking print choose Microsoft Excel File from the save menu.

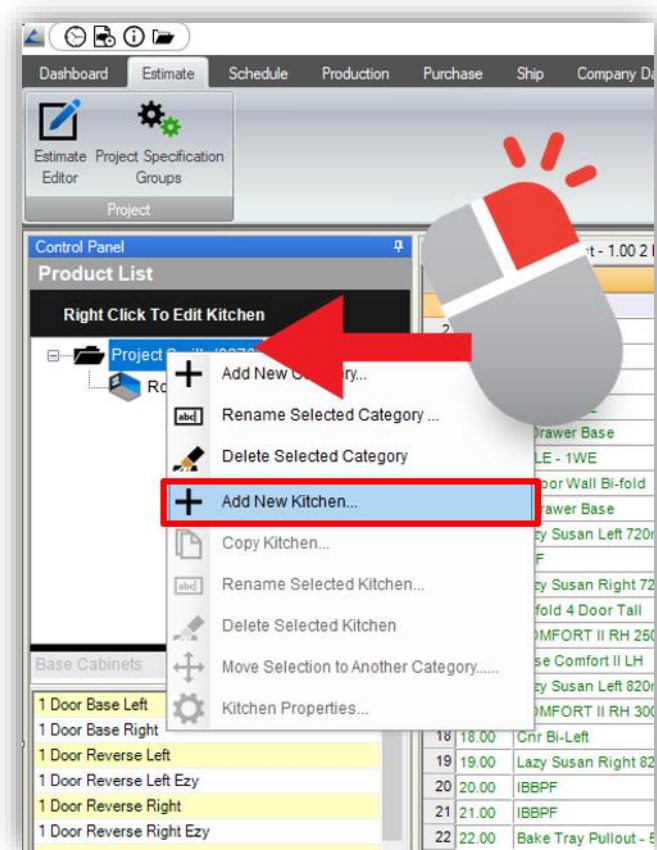

11. Click Ok
12. Path your way to the destination folder and click Save.

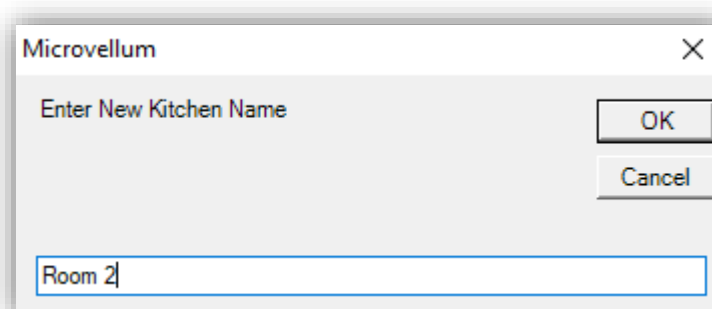

Creating a new room

1. Right click on project and select add new kitchen.

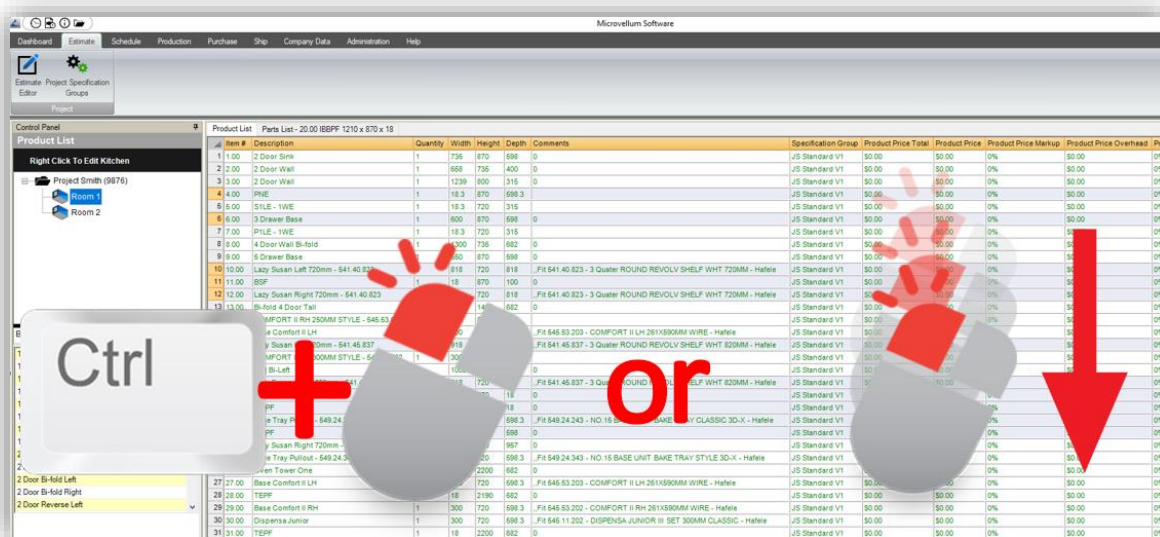

2. Type room name and click ok

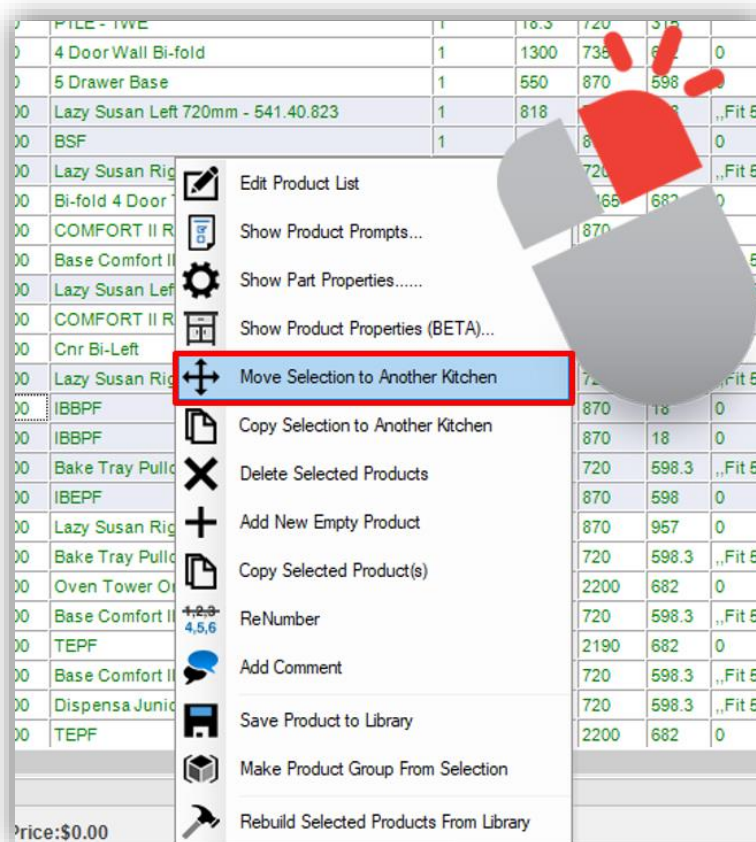

Moving cabinet(s) to another room

1. Left click and drag down over the cabinets you want to move. If they are not all in a row hold **Ctrl** down and left click on the cabinets you want to move.

2. Right click on cabinets then select Move Selection to Another Kitchen

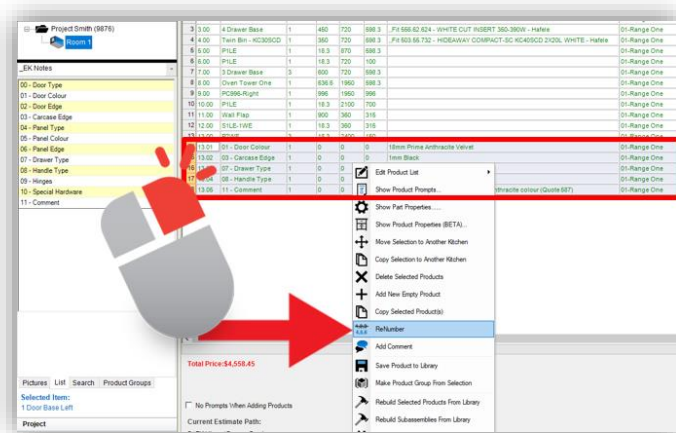

3. Select the room you want to move the cabinets to and click ok

Renumbering

Left click on and drag down over all specs. They will change to a shade of grey when selected. Right click and choose renumber from the menu.

Enter the first item number formatted as below. Remember to start all rooms with a different number set.

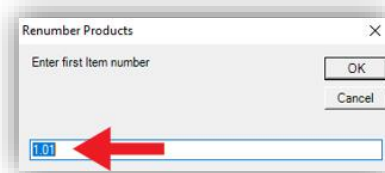

Example: Room 1 start at 1.01

Room 2 start at 2.01

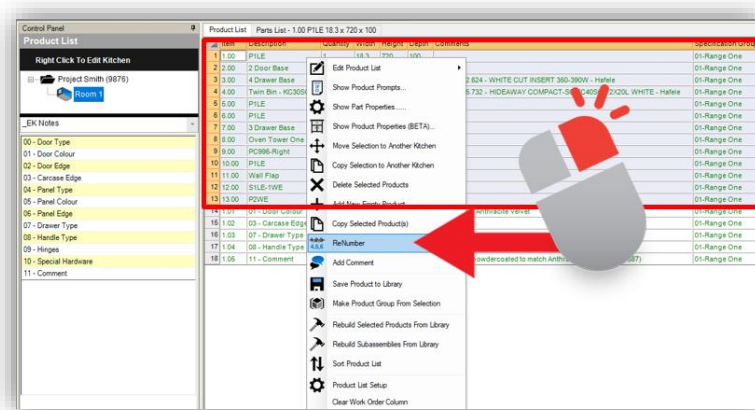

Room 3 start at 3.01

And so on...

Change number then click ok.

Now repeat with the cabinets except start with 1one number greater than the specs you have just renumbered.

In this example the last spec is 1.05 so we will change numbers to 1.06.

Renumbr Products

Enter first item number

OK

Cancel

1.06

Now click on the item at the top and the cabinets will be sorted.

| Item | Quantity | Width | Height | Depth | Comments | Specification Group |
|---------------------------|----------|-------|--------|-------|--|---------------------|
| 15 1.02 03 - Carcase Edge | 1 | 0 | 0 | 0 | 18mm Prime Anthracite Velvet | 01-Range One |
| 16 1.03 07 - Drawer Type | 1 | 0 | 0 | 0 | 1mm Black | 01-Range One |
| 17 1.04 08 - Handle Type | 1 | 0 | 0 | 0 | No Handle | 01-Range One |
| 18 1.05 11 - Comment | 1 | 0 | 0 | 0 | Jay handle powdercoated to match Anthracite colour (Quote 587) | 01-Range One |
| 1 1.06 P1LE | 1 | 18.3 | 720 | 100 | | 01-Range One |

| 8 1.13 Oven Tower One | 1 | 636.6 | 1960 | 598.3 | | 01-Range One |
| 9 1.14 PC996-Right | 1 | 996 | 1960 | 996 | | 01-Range One |
| 10 1.15 P1LE | 1 | 18.3 | 2100 | 700 | | 01-Range One |
| 11 1.16 Wall Flap | 1 | 900 | 360 | 315 | | 01-Range One |
| 12 1.17 S1LE-1WE | 1 | 18.3 | 360 | 315 | | 01-Range One |
| 13 1.18 P2WE | 3 | 18.3 | 2400 | 150 | | 01-Range One |

Standard cabinet specs

All Cabinets has a **flush back**. No back voids.

All upper cabinets have the doors dropping **down 30mm**. The carcass will be the height less 30mm.

Example: Cabinet with 700mm height

cabinet has a 670mm carcass Door = 670 carcass + 30 dropping down + 2 top reveal.

Base Cabinets have **2mm gap on top and flush at the bottom** (Opening, drawers, corners, etc.).

| Parameter | Standard Option |
|--------------|---|
| Door Type | Melamine |
| Door Edge | See Board edge match for standard edge tape |
| Carcass Edge | 1mm White Laser Abs |
| Panel Type | Melamine |
| Panel Edge | See Board edge match for standard edge tape |
| Drawer Type | Alto |
| Handle Type | None |
| Hinges | Tiomos |

Cabinet Sizes

| | Base | Tall | On bench | Wall |
|--------|-------|-------|----------|------|
| Height | 720 | 1950 | 1192 | 720 |
| Depth | 578.3 | 578.3 | 470 | 315 |

(all sizes are in millimetres)

Drawer front heights

| Cabinet | Front | Height |
|---------------|--------------|--------|
| 2 Drawer Base | Top front | 357mm |
| | Bottom front | 357mm |
| 2 Drawer Bin | Top front | 437mm |
| | Bottom Front | 277mm |

| | | |
|---------------|--------------|-------|
| 3 Drawer Base | Top front | 158mm |
| | Second Front | 277mm |
| | Bottom Front | 277mm |
| 3 Drawer Pot | Top front | 237mm |
| | Second front | 237mm |
| | Bottom Front | 237mm |
| 4 Drawer Base | Top front | 158mm |
| | Second front | 158mm |
| | Third front | 158mm |
| | Bottom front | 236mm |

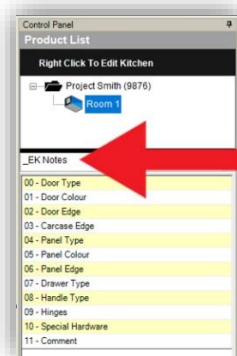

(all sizes are in millimetres)

Hardware

| Hardware | Standard Option |
|------------|-----------------------|
| Hinges | Tiomos |
| Drawers | Alto |
| Flap stays | Blum Aventos |
| Feet | Smart Leg 150mm/110mm |

How to add specifications for Joinery Scene

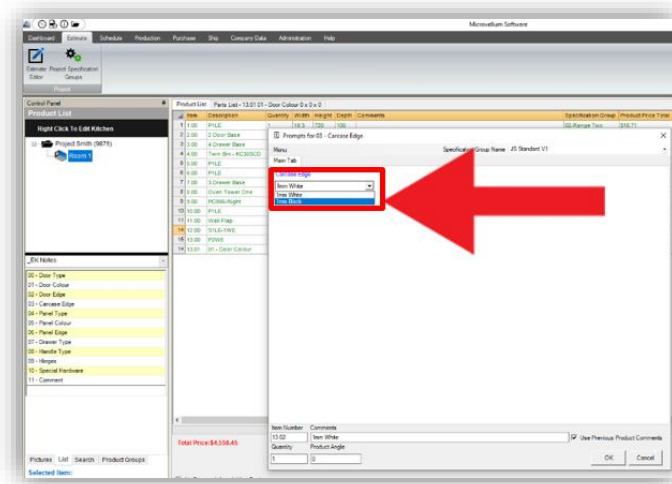

Select the room you want to add the specifications to then select the **EK Notes** from the library

Door and Panel colour(s) are the only specs that need to be added every job. Panel colour is only added if it is different from the door colour. The specs are only to be added if they differ from what Joinery Scene has set to be standard. ([See Joinery Scene Standard](#)).

Example:

If you are designing a White Gloss kitchen with an accent dark colour. You must divide this order in two rooms. One white and one dark. You might want to have a black carcass edge tape for the accent colour. For that, you have to drop the 03-Carcass Edge into your project in the correct room and change the colour of the tape to black in the drop-down box.

Ezy Notes Example:

| Room 1 – Prime White Gloss Plus | |
|---------------------------------|------------------------|
| 01 - Door Colour | Prime White Gloss Plus |
| Room 2 – Prime Black Embossed | |
| 01 - Door Colour | Prime Black Embossed |
| 03 - Carcase Edge | Black |

Shearers stock Prime board

| Colour | Finish | Edge tape |
|------------------------|------------------------------------|-----------|
| Anthracite | Velvet | Laser |

What is a modification?

Examples:

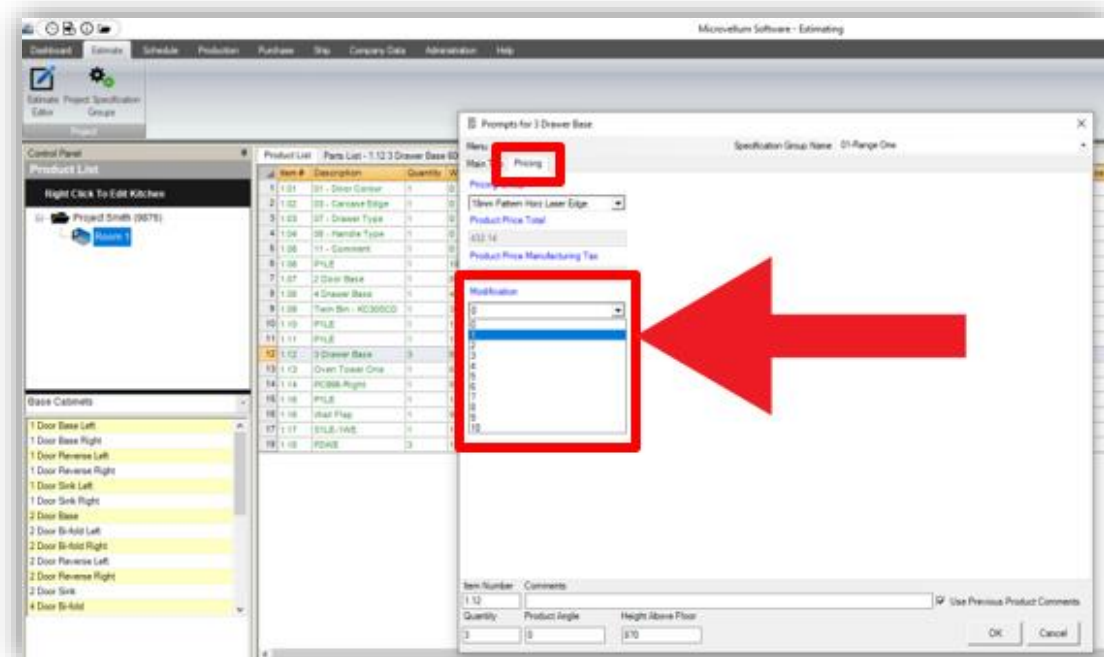

- Routes in a cabinet or panel
- Shelf added
- Door(s) dropping down
- Push catch(s)
- Extra edging
- Ends up past top or below base
- Strip light groove to bottoms of cabinets
- Division added
- Cam a panel to another panel
- Changing inset back
- Moving feet blocks
- Horizontal Grain

Where to find the modification

Right click on the cabinet and select Show Product Prompts.

Select the Quantity of modifications from the Pricing Tab.

Click OK.

Product Prompt & Product List

All changes Height, Width & Depth must be **made from the prompts window**.

Product List

No changes are to be made on the product list because any warning messages will not work.
